EDUCATION

Virginia Tech, College of Engineering

B.S. Computer Science | GPA: 3.63/4.0

Aug 2023-Dec 2026

Blacksburg, VA

- **Honors:** Dean's List (Spring 2024, Fall 2024, Spring 2025, Fall 2025, Spring 2026)
- **Relevant Coursework:** Data Structures & Algorithms, Cloud Software Development, Machine Learning

EXPERIENCE

Quality Assurance Performance Engineering Intern

Fiserv Inc.

June 2025-Aug 2025

Berkeley Heights, NJ

- Built 3 LoadRunner test automation models that detected CPU usage spikes 40% above baseline in Fiserv's DNA core bank processing product to enable performance optimizations.
- Automated security scans for 150K+ open-source libraries that flagged 10K risks and saved 2 weeks of manual work.
- Collaborated with 3 engineers on code reviews and managed 4 Microsoft Azure virtual machines for testing and deployment workflows.
- Utilized: C#, Microsoft Azure, LoadRunner Testing Software

Junior Software Engineering Team Member

EcoCar Challenge Hokie Electric Vehicle Design Team

Aug 2024-Present

Blacksburg, VA

- Implemented an open-source linear Kalman Filter and high-level coordinate transform for 3 real-time sensors perceiving over 100+ messages per second, winning 3rd best overall team in North America out of 13 schools.
- Reduced from 7.5 to 0.5 meters of lateral error deviation from the lane center with Sensor Fusion-in-the-loop implementation, optimizing the Autonomous Lane Centering Control feature in the 2024 Cadillac Lyriq.
- Collaborating with a 4-person team using agile methodologies to design, develop, and test tickets and bugs.
- Utilized: Python, Pytest, Docker, Robotic Operating System

Research Web Developer Intern

VT SuperDarn | Space@VT

Mar 2026-June 2026

Blacksburg, VA

- Deployed 31+ pull requests to a full-stack scientific radar visualization platform, engineering interactive UX features including beam selection, hover tooltips, and one-click plot downloads to significantly promote usability for researchers.
- Expanded analytical capabilities by integrating a baseband data API and implementing customizable, colorblind-accessible colormaps for multi-velocity magnitude rendering and precise time-series vector plotting.
- Utilized: Python, Flask, HTML/CSS, JavaScript, API Integration

PROJECTS

LevelUs | HackViolet 2026 – Best Use of Gemini API Winner

Feb 2026

- Collaborated with a team of 3 to architect and deploy a full-stack application within 24 hours designed to quantify conversational equity and identify social exclusion patterns in the labor force.
- Engineered a real-time processing pipeline using Gemini 1.5 Flash and ElevenLabs for speaker diarization, associating unique voices by frequency and pitch to generate automated behavioral analysis reports.
- Utilized: Gemini API, ElevenLabs, FastAPI, Python, React, Tailwind, Node.js, JavaScript

LEADERSHIP

Executive Board Engineers' Week Chair

Student Engineers' Council at Virginia Tech

Apr 2024-Present

Blacksburg, VA

- Organized the second largest student-led career fair in the U.S. in a 12-person executive board, generating over \$550,000 in revenue and 6,900 student attendees.
- Leading a 3-person committee and \$30,000 budget to enhance the impact of Engineers' Week for 12,900 engineering Hokies at Virginia Tech.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, C, C#, SQL, HTML, CSS, MATLAB, x86 Assembly
- **Framework:** ReactJS, .NET
- **Tools & Technologies:** Git, Kubernetes, JMeter, Microsoft Azure, Cursor AI, PowerBI, Playwright, K6
- **Operating System:** Linux, Windows, Robotic Operating System
